About The Lessons – Students learn physics, mathematics, mechanical & software engineering by watching engaging demonstrations and by building Lego prototypes of real-world machines. Problem solving, critical thinking and collaboration are key elements of the program.

About How We Teach - Some classes operate in a multi-age environment. In all cases, we optimize our delivery according to ability and interest. Lessons and activities are different for each term.

Peace of Mind - All educators are working with children compliant according to state laws. All after-school clubs operate in agreement with the host school.

Young Engineers Club is an Australia-wide initiative to help kids L♥VE & Learn STEM
